

Satya Raga Dharani Chevuri
Manual tester

Email: dharani.chevuri@gmail.com
Mobile: +91 8897752696

Professional Summary:

- 5 years of IT experience in analysis, design, development, testing and implementation of software applications on healthcare, retail, logistics and commercial domains.
- Experience in End to end testing of web applications and performing Web API, backend and data testing.
- Experience creating and executing tests within an agile environment.
- Hands on experience in EDI - ANSI X12 standard format, data transfer protocols and Unit testing.
- Experience in migrating of OnPremise artifacts to cloud using Microsoft Azure Platform with Logic Apps and Enterprise Integration Pack. Worked on testing the business flow of various partners migrated to cloud.
- Experienced in documenting the case studies and the process documents which can be used as a reference by other project teams.
- Good interpersonal skills, commitment to perform quality work and excellent team player.

Technical Skills:

- Functional testing, System testing, Acceptance testing, regression testing, database testing.
- MS SQL
- EDI ANSI X12 and EDIFACT data testing.

Education:

B.Tech in Computer Science and Engineering from Sri Indu College of Engineering affiliated to JNTU (2009 to 2013), Hyderabad

Professional Experience:

Working in HCL Technologies from 30th September 2014 to Till-date.

Project Profile 1:

Project Name	Jarvis
Client	Procter and Gamble
Environment	SQL server 2014, Microsoft .Net Framework 4.6 (Web API), jquery-2.2.3 , Azure cloud (for web hosting), Azure machine learning studio
Role	Manual Tester

Project Description:

Jarvis is a cognitive front-end tool built to help purchase managers in consumer goods companies take more- informed decisions. Some of its key features include sensing macro industry trends/ risks in real time, blending them with internal operational information and recommending actionable insights with the help of Data Science and Machine learning. With Jarvis, purchase

managers will be able to take material allocation decisions at a higher frequency and also have a better handle of critical levers during supplier negotiations.

Roles and Responsibilities:

- Involved in initial discussion of user stories and prepared priority wise test cases.
- Determined user requirements and goals by interacting with client.
- Performed business and functional requirements.
- Performed backend testing such as data integrity, accuracy of stored data and data type and tested application and verified data table content by using SQL queries.
- Generating reports, working with developers to correct issues and upgrading data in database as required.
- Performed cross browser testing.
- Tested Web API by passing URL parameters and used Postman.
- Participated in pair programming with developers for application development.

Project Profile 2:

Project Name	DSV EDI Development
Client	DSV logistics
Environment	Axway B2Bi 2.1, Axway XIB 1.7.44, Putty server, FileZilla
Role	Tester

Project Description:

DSV is Danish transport and logistics, industry leading non asset based supply chain management company that provides Air and Ocean freight forwarding, Contract Logistics and Distribution, Customs Brokerage, inbound logistics and other Supply chain management services. This project deals with onboarding of DSV's new business partners to EDI platform for placing orders, updating the existing business agreements and Transactional changes.

Roles and Responsibilities:

- Experience in Axway XIB, B2Bi maintenance and support.
- Responsible for monitoring the production errors and transaction errors and customer queries.
- Responsible for running daily reports in XIB/B2Bi like Open issues, Closed deliveries.
- Monitoring the tickets raised by the different partners and assigning them to different tracks.
- Assuring that SLAs are not missed and partners are given appropriate solution to their issues.
- Responsible for reporting open issues to client, business analyst and warehouse teams.
- Responsible for smooth operation of all the business processes.

Project Profile 3:

Project Name	Azure Integration Services V2.0 (AISv2.0)
Client	Microsoft
Environment	Microsoft Azure (PaaS), Logic Apps, BizTalk Server 2013 R2, Visual Studio 2015, OneITVSO, SQL Server 2012, Windows PowerShell ISE, Postman
Role	Junior Developer and tester

Project Description:

Microsoft produces products along like Office, Windows etc. along with licenses. Azure Integration Services is a Platform as a Service on Cloud (Azure) which deals with bulk Microsoft product licensing process on cloud. We majorly used Logic Apps to drive inbound and outbound process of different partners of Microsoft like FedEx, DHL, UPS etc.

Roles and Responsibilities:

- Migrating application from On Premise to Cloud (BizTalk 2013 to Azure).
- Worked in development environment for creating artifacts for a partner and tested the business flow of the partner. Unit tested Logic App by Postman tool.
- Performed E2E testing for various partners.
- Worked on Map analysis, XSLT and testing the transform in Logic Apps.
- Migrating BizTalk Map to Logic App transform by fixing the database lookup values in maps as they are not supported in Logic Apps.
- Hands on experience in customizing applications to be cost effective.
- Documented processes related to the project.

Project Profile 4:

Project Name	AmerisourceBergen Corporation Production Support
Client	AmerisourceBergen Corporation
Environment	GXS, Axway Interchange 5.10.1, Axway Interchange (CSOS) 5.10.1, WTX, Microsoft SQL, Websphere MQ explorer 7.5 and Axway Sentinel Monitoring version 4.0.1, SAP
Role	EDI Technical Support

Project Description:

AmerisourceBergen Corporation is a healthcare supply chain company which is driving innovative partnerships with manufacturers, providers and pharmacies to improve product access. AmerisourceBergen provides product commercialization and distribution to pharmacy, provider and manufacturer solutions. Amerisource Bergen Corporation uses WTX for all EDI B2B translation

services. Engagement with AmerisourceBergen Corporation involved 24*7 EDI operations support (monitoring and clearing all failures/ resolving tickets raised by internal groups or customers and ensuring maximum system uptime). Amerisource Bergen Corporation also has various non-EDI platforms for ordering by customers and EDI accepts file types like ANSI X12, XML, flat files which then will be converted into idocs and will be routed to backend system (SAP) for processing.

Roles and Responsibilities:

- Responsible for overall delivery to customer from EDI support operations (24*7) standpoint.
- Involved in all meetings with customer to understand their business requirements and also planning and executing from offshore.
- Maintaining EDI knowledge repository.
- Responsible for monitoring and maintaining all EDI applications (Axway Interchange, WTX) with seamless transaction flow with maximum availability of systems.
- Handling all EDI inbound and outbound failures, fixing the data or maps if required and reprocess them on time in order to meet the customer SLA's.
- Handling all incidents and issues received from customers or internal users regarding all EDI issues. Creating partner profiles in Axway Interchange and WTX and involved in testing with customers while onboarding them.
- Responsible for handling EDI maintenances on customer side (Restarting all EDI applications, validating EDI applications and taking necessary steps).
- Joining weekly calls with customer to review all EDI incidents\ Changes.
- Responsible for changing parameters (IP address, URL ...) on Axway Interchange incase of any issues or changes on partner end.
- Monitoring of various message queues in Websphere MQ Explorer 7.5 and take necessary action in case of issues.

DECLARATION:

I hereby declare that all the information given by me is true.

Place: Hyderabad
